BACKEND SKILLS

LARAVEL	PHP
ELOQUENT	REST API'S
TESTING	QUEUES
CACHING	FILAMENT

FRONTEND SKILLS

VUE.JS	INERTIA.JS
LIVEWIRE	TAILWINDCSS
TYPESCRIPT	NUXT.JS

OTHER SKILLS

MYSQL	GIT
DOCKER	CI/CD
TDD	DDD
AI WORKFLOWS	LINEAR/JIRA

WORK EXPERIENCE

Verne Health (July 2025 - June 2026) — Team

Laravel, Vue/Nuxt, TypeScript, Tailwind, Docker, MySQL, PHPUnit

- Built ZorgDomein referral integration: receiving and processing GP referrals via a FHIR endpoint with JWT-verified inbound requests
- Built questionnaire module (config, scoring, dashboards, scheduling) and quality registry exports (SKF, NIVEL, LDF)
- Designed an extensible letter template system for GP correspondence: typed parameters, conditional fields, validation and PDF rendering
- Extended and productionized billing integrations (Yuki, Twinfield, Exact Online, Infomedics): accrual dates, ledger accounts, credit notes, and insurer contracts and tariffs per year
- Led major data model refactor to organization-based multi-tenancy
- Patient email preferences with organization- and location overrides
- Raised delivery speed: Laravel 12 & 13 upgrades, Pint/Rector + pre-commit hooks, automated releases, faster test suite

Wascapsules.nl (January 2024 - Present) — Creator

Laravel, Livewire, Tailwind, MySQL, Pest

- Migrated the entire platform from WordPress to Laravel/Livewire
- Built detergent price comparisons, historical price tracking and alerts
- Grew monthly revenue from €30 to €250

Websiteflipper.nl (June 2025 - Present) — Creator

Laravel, Vue, Inertia, TypeScript, Tailwind, MySQL, Pest

- Built a full marketplace platform with real-time chat, website valuation tool & Stripe payments
- Implemented advanced search & filtering across multiple website categories (blogs, SaaS, webshops, domains, social accounts)
- Developed admin panel, blog system, contact/favorites, screenshot generation & SEO-optimized listing pages

CLTopmaat.nl (February 2025 - June 2025) — Solo

Laravel, Filament, Livewire, Vue, Inertia, TypeScript, MySQL, Tailwind

- Built a platform connecting clients and sawmills for CLT production
- Implemented order management with bulk orders, quotes, design reviews & invoicing workflows
- Developed client and sawmill portals with role-based access control
- Integrated webshop with cart functionality and Stripe payments

Nina Care (August 2023 - February 2024) — Team

Laravel, Filament, Livewire, Vue, Inertia, TypeScript, MySQL, Tailwind

- Rebuilt onboarding flow and improved booking & communication UX
- Strengthened payment & membership logic (unique mandate links, chat access flow)
- Delivered matching, notification & admin improvements across the platform

Home Design Shops (October 2020 - July 2023) — Team

Laravel, Vue, JavaScript, Vuetify, MySQL, Tailwind

- Built internal tools and automation workflows such as: website image management, purchase advice/order flows, Picqer WMS integration, stock sync (Picqer to MySQL), delivery date estimations, optimal doormat/rail cutting, Algolia search, Amazon order syncing and price management for marketing.

Huisprijsoptvragen.nl (February 2023 - Present) — Creator

Laravel, Vue, JavaScript, MySQL, Tailwind

- Built property price lookup platform with Kadaster/PDOK/BAG data
- Added payments, real-time chat, admin panel, blog & SEO tools
- Implemented address import, PDF/Excel processing & autocomplete search

EDUCATION

Master of Science: BioRobotics Delft University of Technology

September 2016 - February 2021

- Completed robotics coursework (Linux, C++, Python, ROS) and thesis with Heemskerk Innovative Technology
